As a Product Manager at MIM Finance, I oversaw the end-to-end development of both web and mobile loan platforms. I launched and improved multiple secured and unsecured loan products (Credit Builder, WageX, Salary Advance, SME Loans) while ensuring regulatory alignment with AML, KYC, and Recova requirements. This resulted in consistent revenue exceeding ₦150M monthly and kept non-performing loans below 5%.

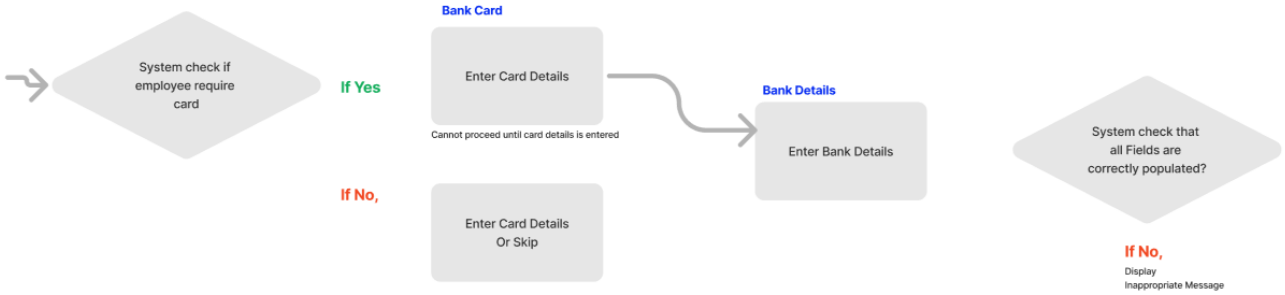
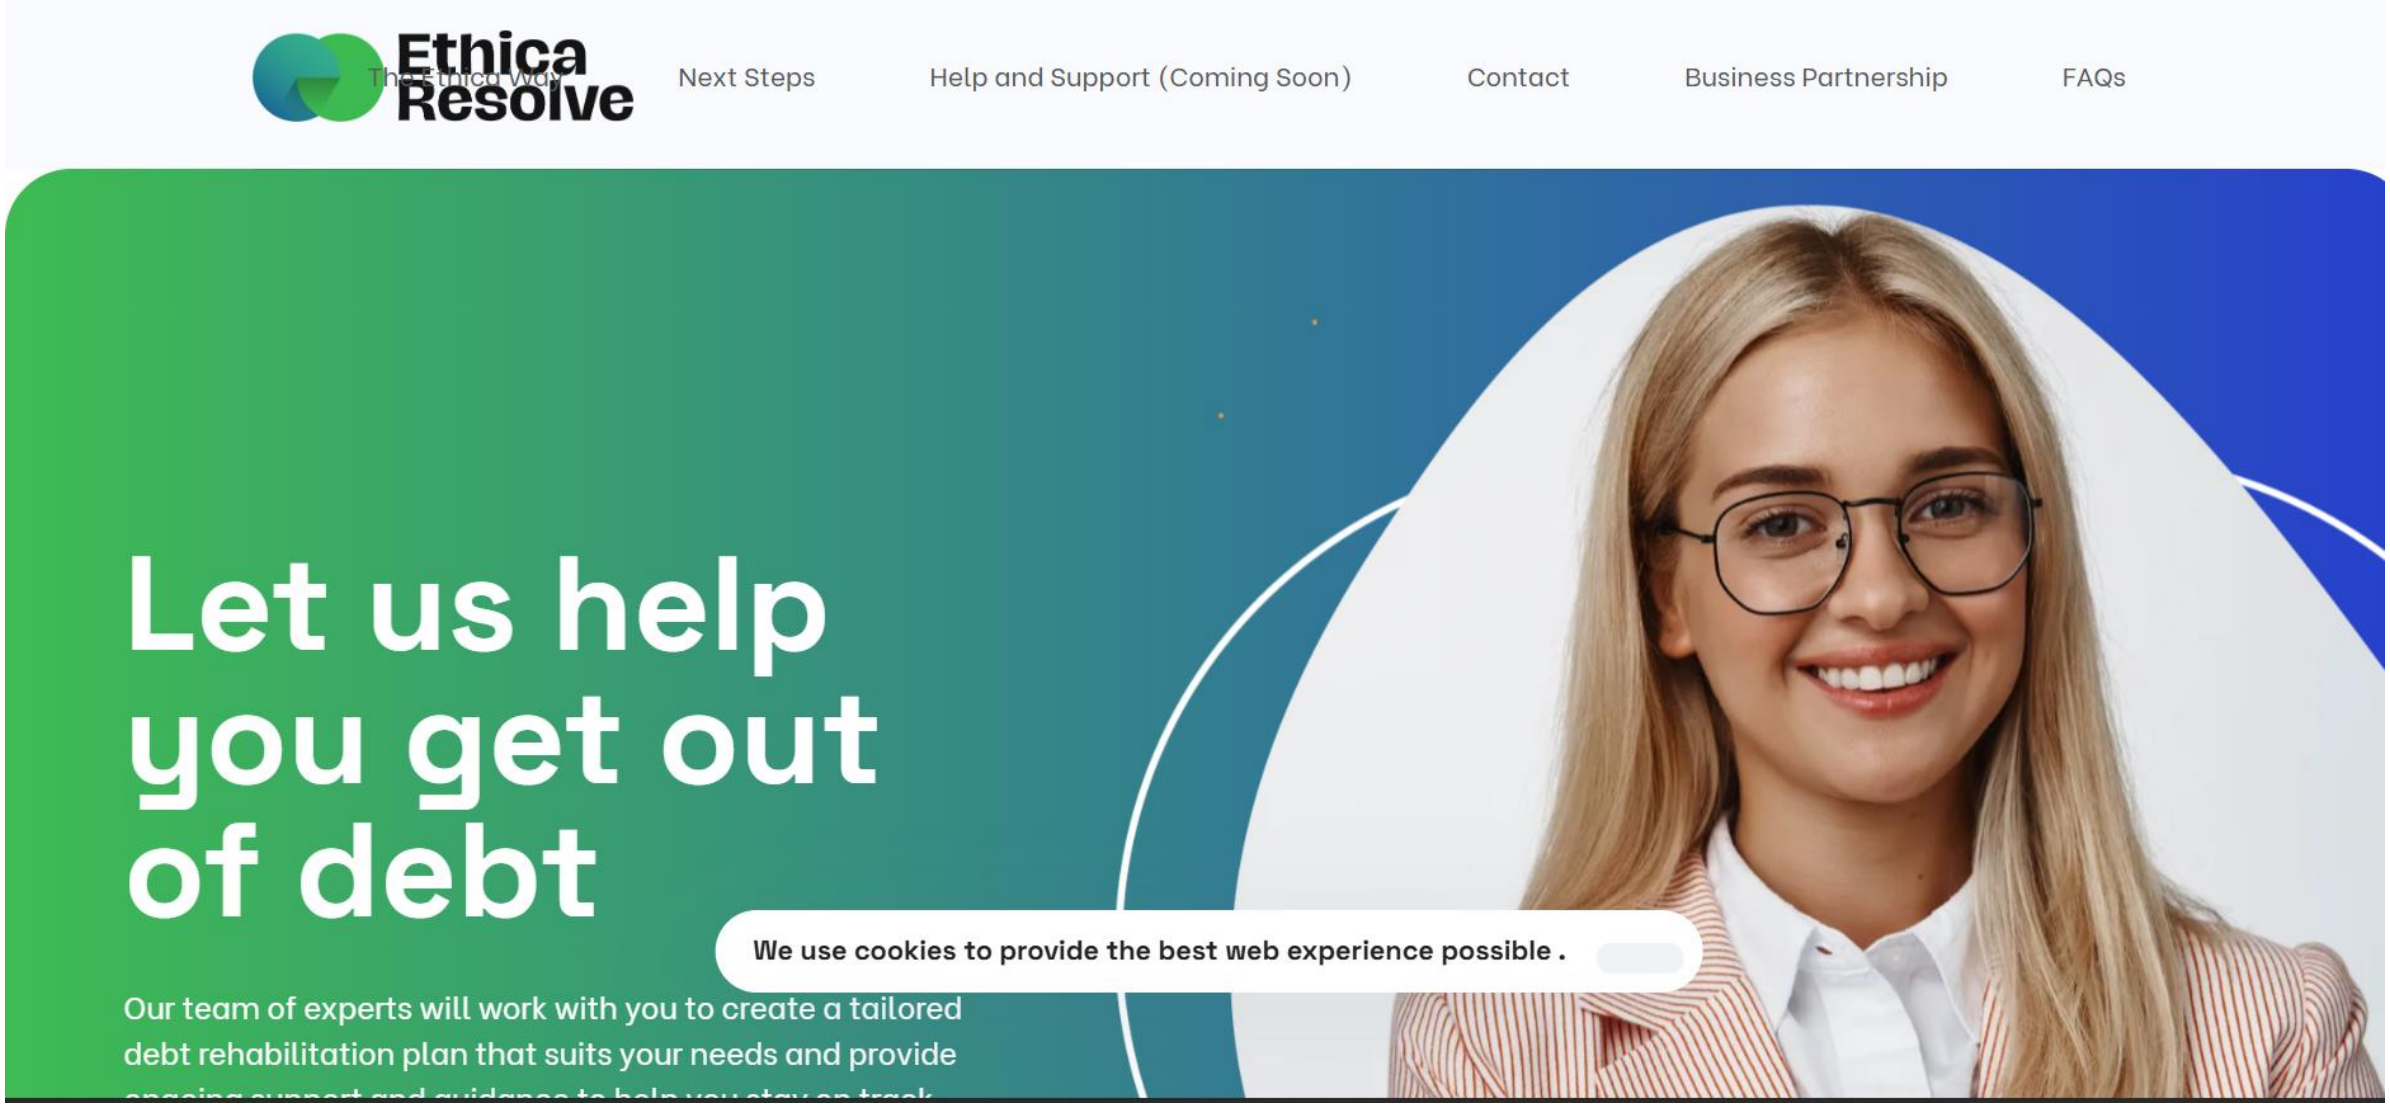
Product Flow





As a Product Manager at Ethical Resolve CC, I built the core workflows, compliance structures, and operational systems that enabled the company to launch and serve FCA-regulated UK partners. I designed ethical debt-collection processes, strengthened data-protection practices, and helped establish the talent pipeline through the Ethical Resolve Academy.

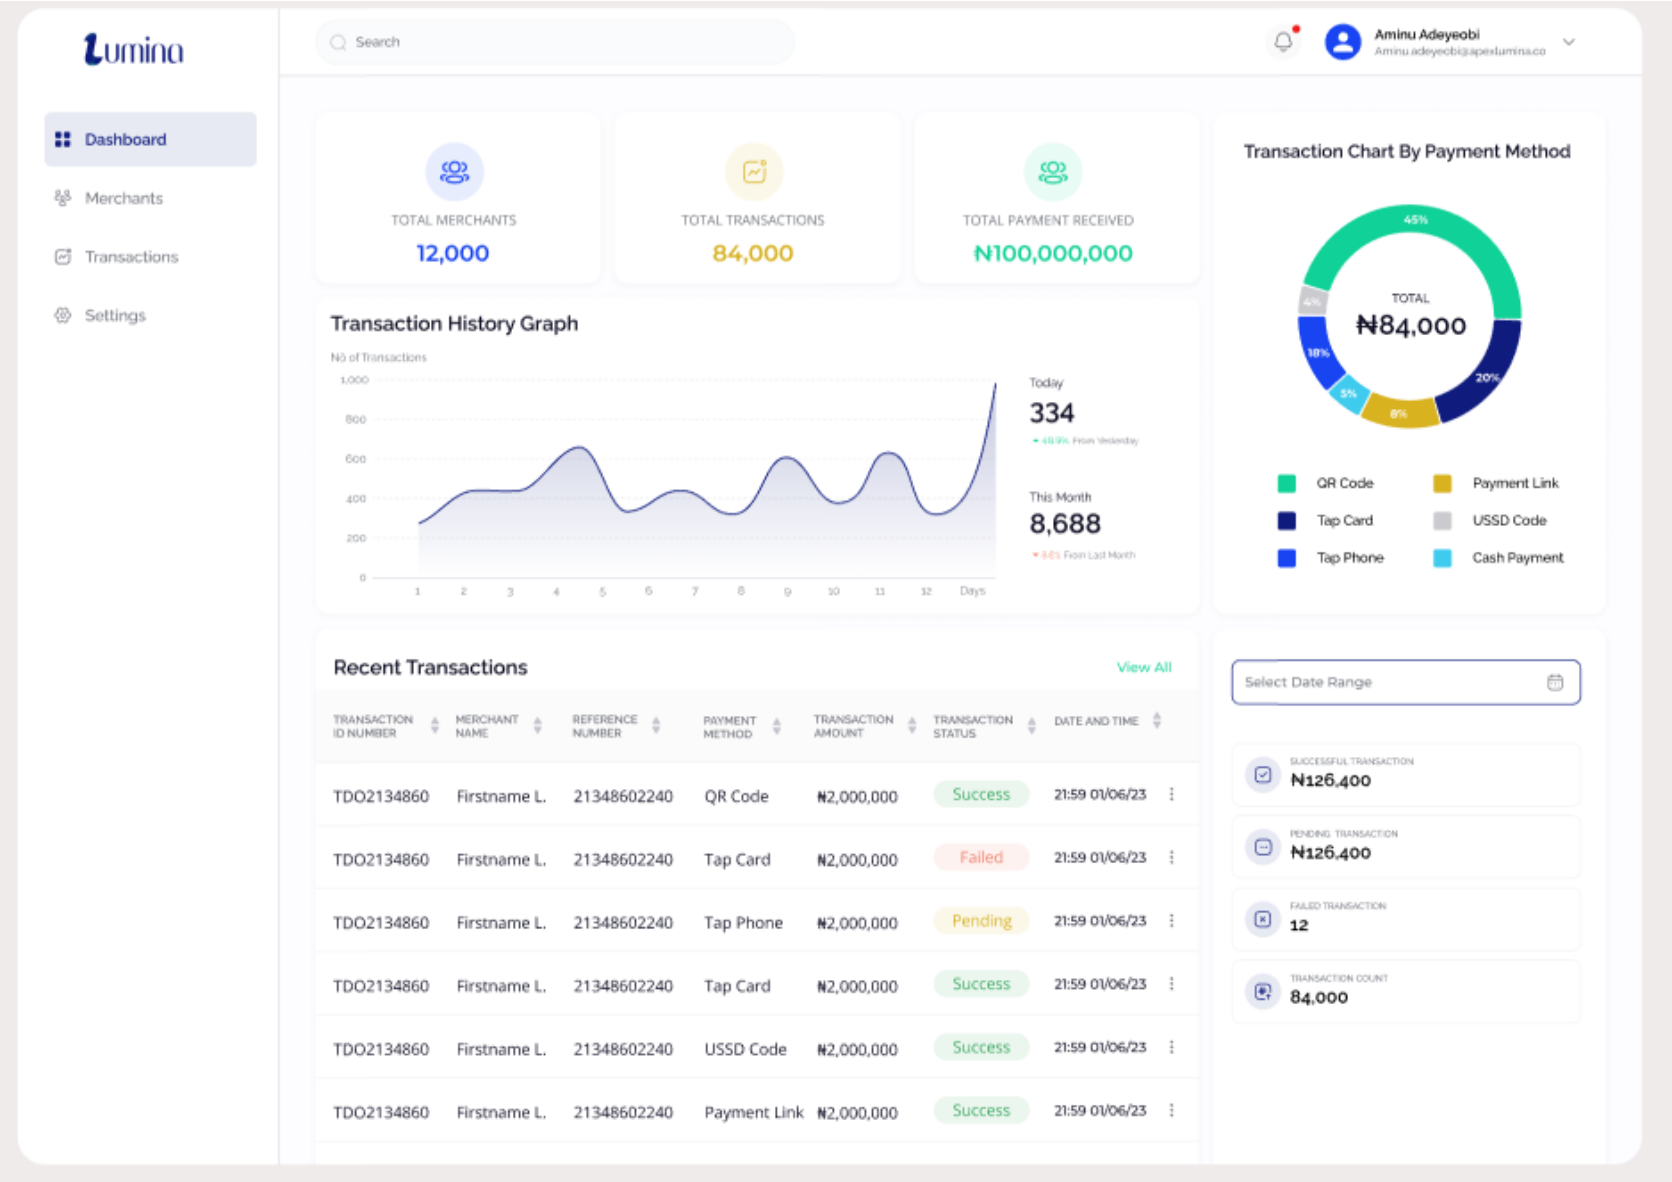
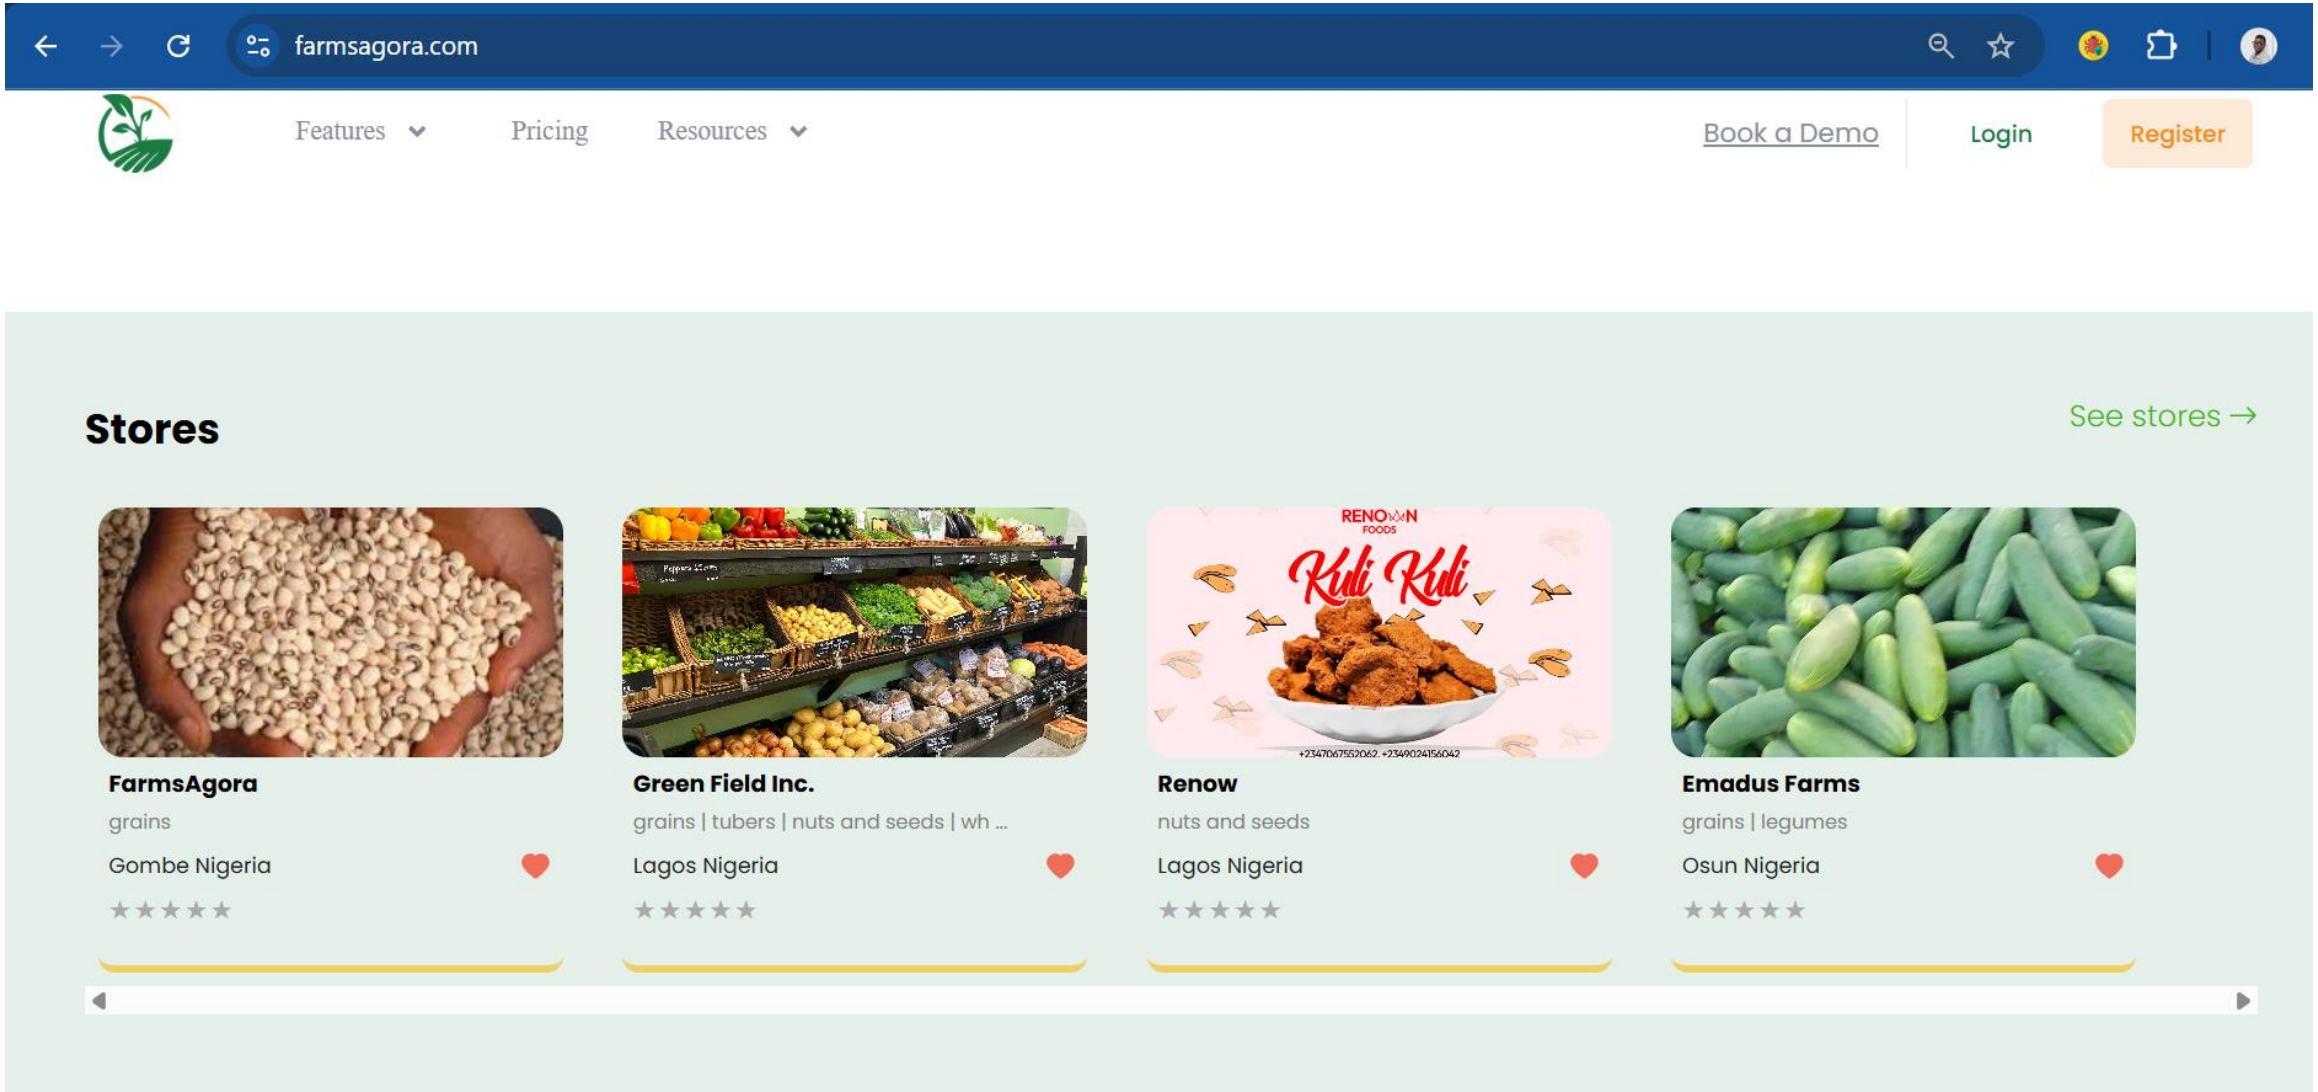
Collect your money sharp sharp

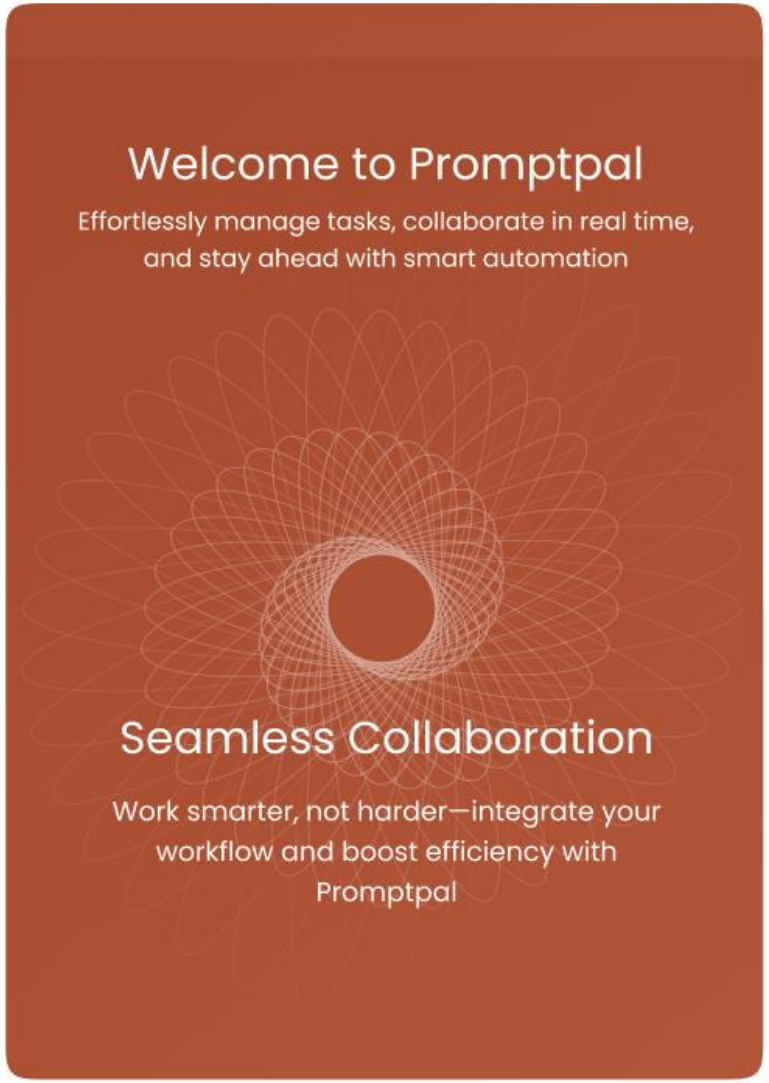
Fast, hassle-free payments at your fingertips.
Keep your business moving.

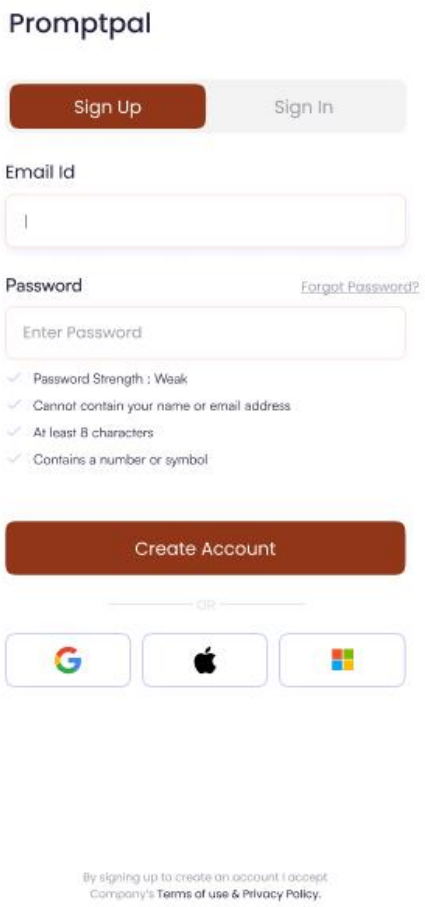


At Luminna, I designed the end-to-end payment journey that allows merchants to receive secure, instant payments through NFC card reading. My product decisions enhanced transaction success rates, reduced friction, and strengthened user confidence across all merchant touchpoints.

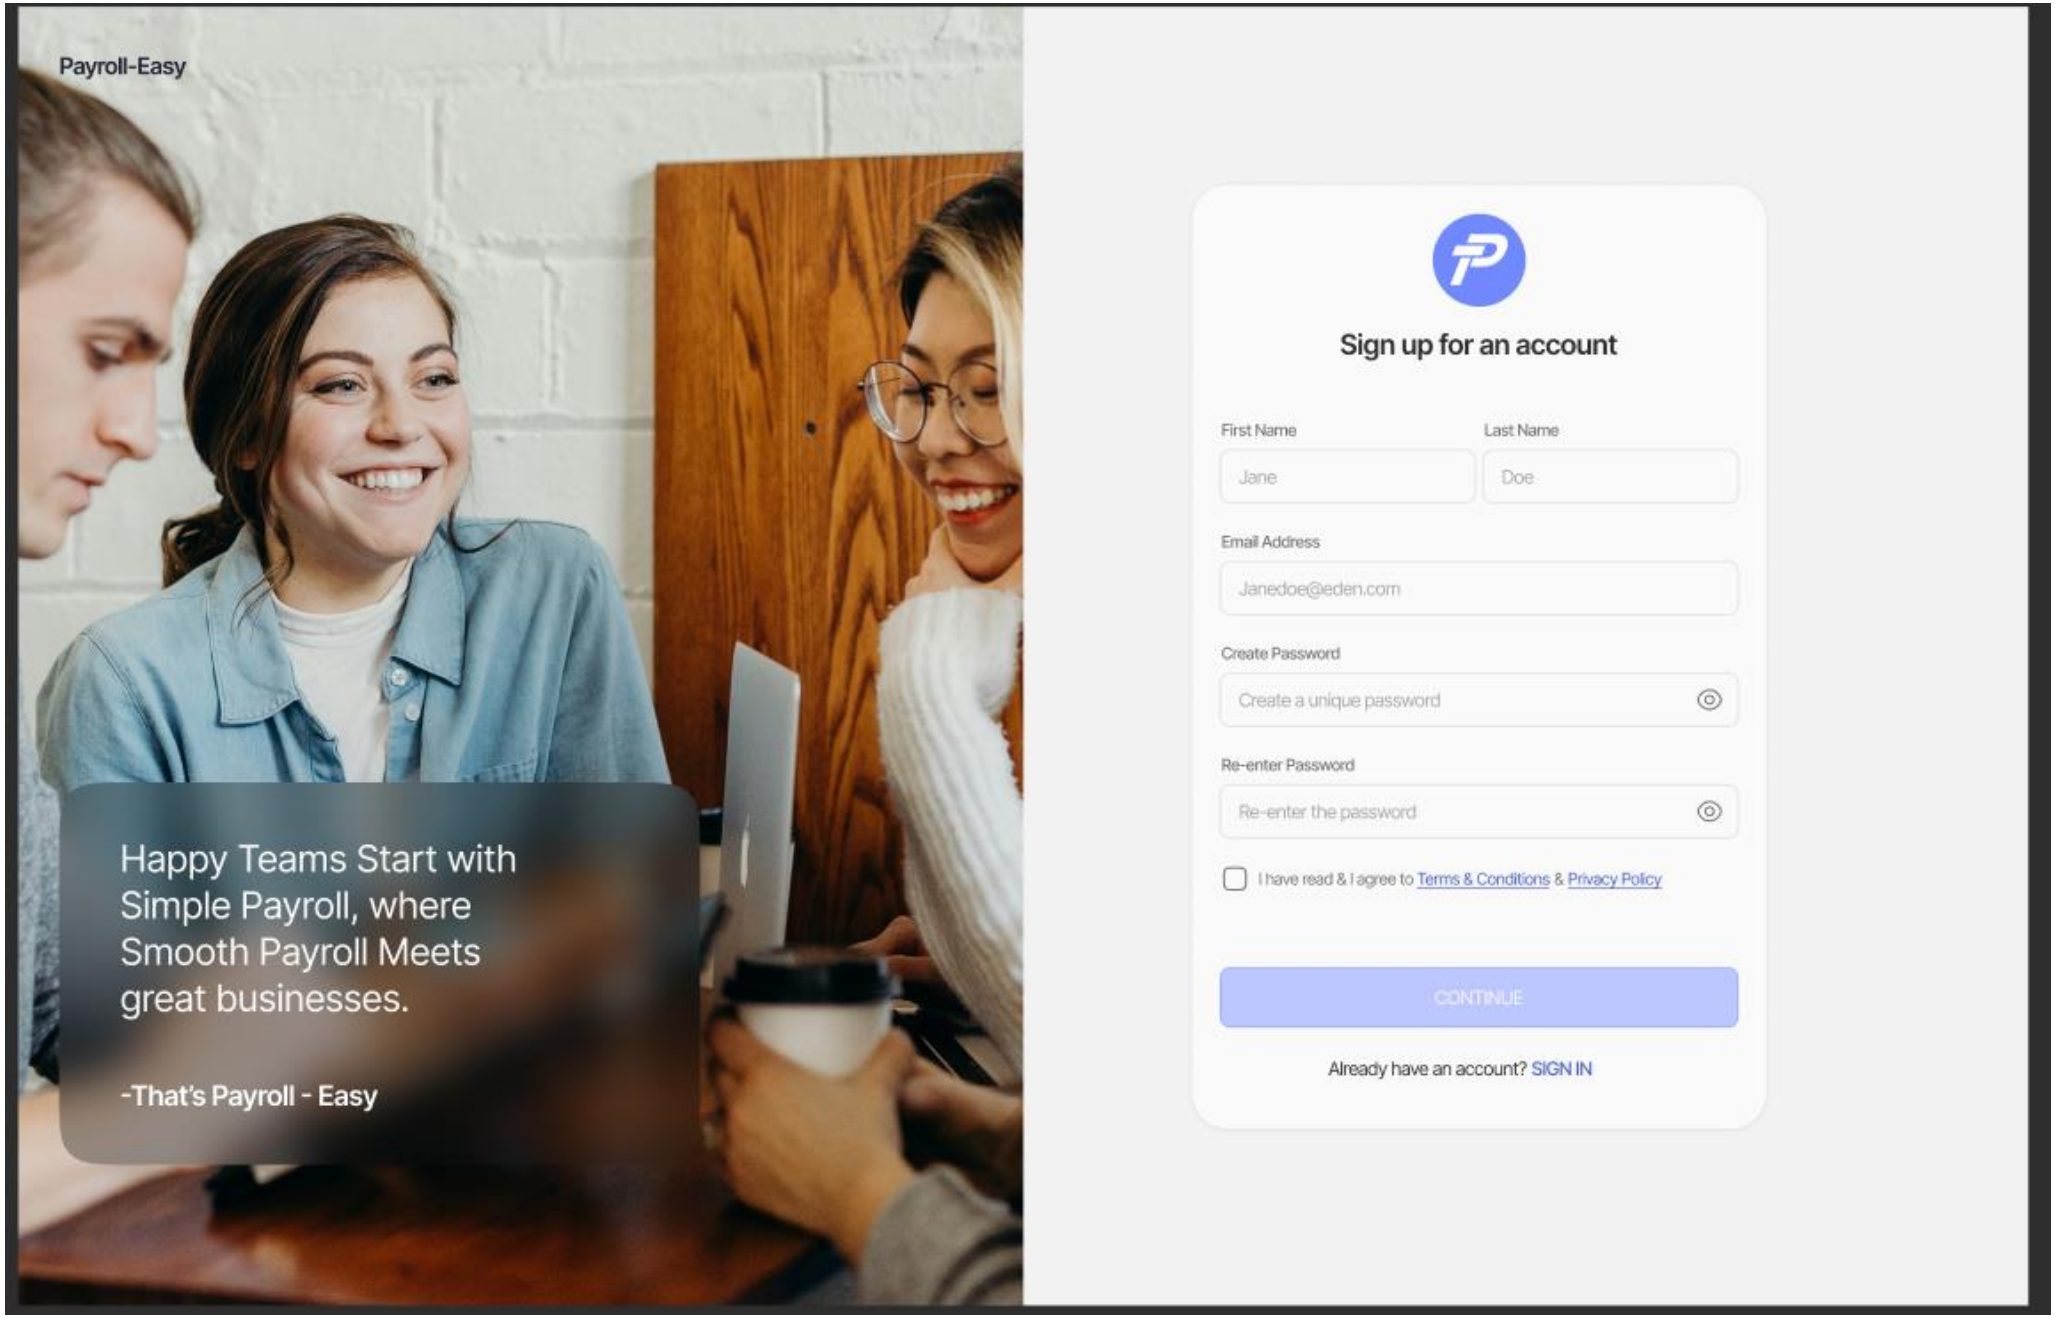


As Product Manager at Farms Agora, I designed and optimized the core workflows that enabled farmers and merchants to transact seamlessly, access financing, and manage their agricultural operations digitally. I improved platform reliability, introduced compliance-aligned processes, and delivered product enhancements that increased user adoption and strengthened the company’s value across its supply chain network.





As Product Manager at PromptPal, I designed and streamlined the core workflow processes that enabled users to generate, manage, and deploy high-quality prompts efficiently.



A Payroll System for UK Client, with 3 Payroll types
